Education

University of Waterloo Sept. 2026 – Present
Bachelor of Computer Science (Honours, Co-op) *Waterloo, ON*

Jean Augustine Secondary School Feb. 2024 – Jun. 2026
Ontario Secondary School Diploma | 90% Average *Brampton, ON*

- **Awards**: 1st Place, Yorks Regional Chess Tournament; Advanced to **DECA Ontario Provincials** (Business Technology)
- **Activities**: MSA Executive, Varsity Table Tennis

Technical Skills

Languages: Python, TypeScript/JavaScript, C/C++, SQL
AI & ML: LangChain, OpenAI/Anthropic APIs, RAG, Prompt Engineering, Structured Outputs
Frontend & Mobile: React Native (Expo), React, TypeScript
Backend & Cloud: FastAPI, PostgreSQL, Docker, AWS, CI/CD, Git/GitHub

Experience

Software Developer & Marketing Technologist Aug. 2025 – Jan. 2026
Maira Khan International *Remote (concurrent with high school)*

- Architected and automated **data-driven content pipelines** across TikTok, Instagram, and YouTube, scaling total reach to **500M+ views** — leveraging data analytics and A/B testing to extract insights and optimize content distribution.
- Owned full-stack **Shopify platform engineering** — built and maintained product catalog systems, automated inventory data workflows, and analyzed e-commerce metrics to optimize the conversion funnel end-to-end.

Web Developer Mar. 2024 – May 2024
Flingerz Dog Toys *Remote (concurrent with high school)*

- Built and deployed a **production retail store locator** indexing **1,200+ locations** with mapping APIs and geospatial search, directly enabling new retail partnerships and expanding the company's distribution reach.

Projects

StimAI | *React Native (Expo), FastAPI, Python, Anthropic API (Claude), TypeScript*

- Built a **full-stack AI fitness app** end-to-end — mobile UI, FastAPI backend, and all AI — engineering **Python data pipelines** to compute personalized macros and adaptive workout plans from structured user health data.
- Engineered a **health-aware adaptive routine engine** using Claude with **structured outputs**, rebuilding workout plans in real time around stated conditions (e.g. swaps barbell squats for leg press on a knee injury); computes personalized **macros via Mifflin–St Jeor / TDEE** pipeline.
- Shipped an **AI Coach** with full profile context, multi-thread conversation memory, and **live web search** for real product links; built a **Vision coach** (Claude vision + TTS) that reads the camera feed in real time and coaches form and bodybuilding poses out loud hands-free.

BrandIQ AI | *React, FastAPI, PostgreSQL, Docker, AWS | In Progress*

- Architected an **AI-powered SaaS platform** automating brand management and marketing analytics — built **data pipelines** to ingest, transform, and analyze social media and e-commerce data, surfacing actionable insights through sentiment analysis, competitor benchmarking, and brand identity scoring.
- Built scalable **data pipelines** transforming Shopify and social media metrics into actionable business insights; deployed to **AWS with CI/CD workflows, authentication, monitoring**, and production-ready architecture.

VR Career Simulation | *Unity, OpenXR, C#, Meta Quest 2 | DECA Ontario Provincials*

- Built an **immersive VR experience** in Unity + OpenXR for Meta Quest 2 where users step into simulated professional workplaces (office, studio, lab) and make real-time career decisions — submitted as a technical business solution for the **DECA Ontario Provincial Competition**.
- Iterated on environment realism and interactivity through structured user-testing; received strong feedback for immersion quality and practical applicability in career guidance contexts.
